YOUR TURN

Find a paper published in a major journal that reviews a literature that interests you. The review may be either narrative or quantitative. Be prepared to discuss the following issues as they pertain to the paper you selected:

What research question(s) motivated the literature review?

What methods were used for the literature review? Is the method appropriate to the research question? Do you agree with the author(s) methodological choice? Why or why not. What other method(s) might have been employed? What would be the benefits of using these method(s)?
